2. Sport England - Sport Future Strategy

The Government is redefining what success looks like in sport, concentrating on five key outcomes:

1. **physical well-being**
2. **mental well-being**
3. **individual development**
4. **social and community development**
5. **economic development**

All new government funding for sport and physical activity will go to organisations which can best demonstrate that they will deliver some or all of the five outcomes in this strategy. It is likely that organisations which show that they can work collaboratively and tailor their work at the local level will be best placed to access this funding.

Behavioural insights and an understanding of how to help people make better decisions themselves will be at the heart of the new approach to delivering sport and physical activity.
